Ontario College of Teachers, # 617576
Manufacturing / Robotics Teacher
Lead mentor, FIRST Robotics Team 4946
Lead Mentor, Vex Robotics

April 19th 2017

To whom it may concern,

I have known Thomas Radonic for three years and it is with great pleasure that I write this letter of recommendation for him. There are only a few students that I have met in my 10 + years of teaching that are uniquely inquisitive and intelligent like Thomas. I have never seen him take on a challenge that he did not complete without adding something more to what was requested.

Thomas has a unique and very calm approach to problem solving. As an example, Thomas had to collaborate with team members and design a custom Robot manipulator. Thomas used excellent problem solving skills to conceptualize, design and build a manipulator that could accomplish a very defined task in more than one way. I have kept this unique design as an exemplar for my other classes. His collaborative skills, strong academic record and enthusiasm to learn allows for great ideas to nurture.

I can point to many other endeavors that Thomas has been actively involved with (Design club, FIRST Robotics Team Senior member) where he has always made a positive contribution and has shown leadership skills: Thomas has always lead by example with extra hours in the classroom, or after school and during lunches to complete projects and learning community initiatives. In my professional opinion, I know that any company would benefit by having Thomas Radonic as an employee. Please accept this as a letter of recommendation for his future endeavors. You can contact me via email or at home at any time.

Sincerely

Tibor Torontali
