To Whom it May Concern,

I was Thomas Radonic's supervisor at Matcor Metal Fabrication for his 2019 Co-Op Term. I am pleased to provide this letter of reference for any position that Thomas is applying for.

Thomas was a consistent and valued member of my team. When given short term, Prototype Management, and long term, updating our internal drawing files, projects, he was able to complete them competently and successfully. He was able to learn new programs, CREO, to create flat patterns from 3D model very quickly, and brought with him a desire to learn new skills. Most importantly, he was able to hit the ground running, adapting to our team, and absorb a lot of information in a short period of time. Thomas would be a valued addition to your team as he was with mine.

If you have any further questions, I can be contacted through email or phone.

Regards,

Daniel Cho Engineering Manager
